

Professional Summary

Senior Full-Stack Developer with 9+ years of experience delivering scalable web platforms across e-commerce, SaaS, and enterprise systems. Strong record of technical leadership, project ownership, and strategic decision-making, translating stakeholder requirements into secure, high-performance solutions.

Work Experience

Senior Web Developer	JetCamp BV Lithuania (Property Management)	2025 – 2026
----------------------	--	-------------

- Took ownership of maintaining and improving the company's core web application ([Jetcamp](#)).
- Delivered new features and systematically refactored and documented legacy code to modern standards.
- Improved backend API performance through profiling, optimization, and architectural improvements.

Notable Achievements:

- Discovered and fixed a 5-year-old bug that causing computation error in the review algorithm.
- Actively participated in the feature implementation needed for the planned expansion to new countries.

Language / tools used: PHP, Laravel, VueJS, Filament, BootstrapCSS, JIRA, Mailpit, Redis, SQS, Docker, Laravel Sail, RabbitMQ, MySQL, Elastic search, AWS, Postman, Swagger

Senior Fullstack Engineer	Golden Tree d.o.o. Slovenia (E-Commerce)	2024 – 2025
---------------------------	--	-------------

- Implemented DHL and other regional courier API integrations to enable automated shipping.
- Designed and delivered proof-of-concept solutions to handle increasing data volume and scalability requirements.
- Significantly improved the performance of key system processes through backend and server-side optimization.

Notable Achievements:

Language / tools used: Laravel 10, VueJS, MySQL, TailwindCSS, Linux, JIRA

Senior Software Engineer	Fulcrum Solutions Stack, Ltd. United States (Outsourcing)	2020 – 2024
--------------------------	---	-------------

- Delivered multiple solo full-stack projects during the company's early-stage growth.
- Worked across multiple technology stacks and frameworks, adapting to diverse client requirements.
- Served as a technical interviewer, contributing to engineering hiring decisions.

Notable Achievements:

- Led requirements gathering and defined technical solutions to a project leading to 40% YTD growth.
- Served as a key technical adviser, guiding decisions on coding standards, frameworks, and technology stack.

Language / tools used: Laravel 8 to 10, PHP, NodeJS, ReactJS, NextJS, NestJS, MySQL, PostgreSQL, Redis, DynamoDB, MongoDB, AWS, Linux, CI/CD, Microservice Architecture, Serverless, Wordpress, Filament, TailwindCSS, BootstrapCSS, Pug, Python, JIRA, Postman, Swagger

Throughout my time at Fulcrum Solutions, I was deployed to external companies for specialized project assignments.

[Portable](#)

2024 – 2025

Australia

- Maintained the company's in-house CMS (Laravel and Filament), an in-house replacement for WordPress.
- Developed and customized systems for organizations such as [Volunteering Australia](#) and [VEOHRC](#).
- Assumed temporary ownership of the [Volunteering Gateway](#) project following the departure of the lead developer.
- Became the sole developer to maintain and finish the requested internal feature of [Fitzroy Legal Service](#), [Anzsog](#), and an in-house tool for [Copenhagen Infrastructure Partners](#).

Singapore

- Upgraded the web system from Laravel 5.2 to 9.x
- Proactively uncovered and resolved major security gaps through an in-depth codebase review.
- Architected and deployed auto-scaling solutions, removing the need for manual intervention during growth spikes.

Senior Web Developer

Fourello Multimedia Services

2018 – 2019

Philippines

- Established coding and deployment standards that continue to be used across the company.
- Evaluated, recommended, and mentored developers who went on to become key contributors.
- Served as the primary technical representative in client meetings and requirements-gathering sessions.
- Engaged directly with senior stakeholders and executives, including Robinsons Corporation leadership, UN Development Programme representatives, Bangsamoro officials, and company CEOs.
- Proposed and led the development of a virtual event platform, enabling the company to pivot into a new market in 2020 and sustain operations during lockdown-related financial challenges.

Notable Achievements:

- Spearheaded the formalization of various aspects of development such as coding standards, development flow, and documentation
- During the pandemic, my solution to a problem we encountered was improved and turned into a product that saved the company during financial turmoil
- Implemented scalable solution via AWS Elasticbeanstalk that allows the app to handle 0 to 10,000 concurrent users in matter of minutes

Language / tools used: Laravel, VueJS, Filament, AWS, MySQL, Postman, AdonisJS, NodeJS, Serverless Architecture, Microservice Architecture, JIRA, Monday

Associate Software Engineer

DibzTech Inc.

2017 – 2017

Philippines

- Became a pioneer member of the development team that wrote the back-end side from concept to launch
- Maintained and implemented new features based on investor's requirements

Notable Achievements:

- When our lead back-end developer left, I was given the responsibility to do the knowledge transfer and ensure everything can still be maintained after he left
- Discovered and prevented a problem with our rewards algorithm that both has legal and technical implication

Language / tools used: PHP, Laravel, CSS, VueJS, Javascript, JIRA, AWS (EC2, RDS, SQS), BootstrapCSS

Junior PHP Developer

Simplex Internet Philippines

2016 – 2016

Philippines

- Maintained and extended an in-house PHP and CSS framework
- Created plugins for [Cafe24](#) (the company's product)

Language / tools used: PHP, in-house custom PHP Framework, CSS, Javascript, in-house custom CSS Framework, Redis, JIRA, MySQL

Freelance Experience

During the pandemic, I handled freelance projects in parallel with my full-time responsibilities, with full transparency and alignment with my employer.

Vaskeappen

Norway

2021

[Vaskeappen](#) is a Norway-based on-demand cleaning service. I was contracted to write the back-end and admin dashboard MVP during its conceptual phase. The codebase was later sold to another company of which I facilitated the knowledge transfer.

New Avenue

United States

2021

I was contracted to implement some dashboard features such as messaging integration, analytics, and some optimization in their Admin Dashboard.

GNX

The Netherlands

2022

I worked with the GNX team to implement some admin dashboard monitoring and analytics pages.
